CODERHOUSE  
In Process...

Full Stack Web Development Career, where currently I am learning technologies for developing both Back-end and Front-end

EXPERIENCE

UTVAM  
2018

PROGRAMMER

Technical internship project.  
I developed the first stage of a multimedia platform structure for language courses hosting, where users will take tests about different languages.  
I built this project in VISUAL BASIC.

Technology Business & Research (TBR)  
2020 - 2021

DIGITAL MARKETING ASSISTANT

Engineering Internship Project.  
I supported in the creation of didactic resources based in IT. In this project I got basic knowledge about marketing.  
I made advertising images and illustrations using ADOBE ILLUSTRATOR following the requirements of Facebook, Twitter and LinkedIn for their good optimization in each social network.

PROGRAMMER AND DIGITAL MARKETING ASSISTANT

I attended the "Mi primer empleo, mi primer salario" program, supporting the marketing digital strategy for promoting the enterprise's services.  
I segmented a potential customers catalogue in EXCEL and I graphed the results. Subsequently with that information I generated a database in MySQL and I developed interactive graphics showed in a website which allows the users to filter the information that they want to analyze and export it in different formats.  
I used PHP for establishing communication with the database, JAVASCRIPT for interactivity, HTML and CSS for the structure and visual styles.

TBR  
2021 - 2022

SOFTWARE PROGRAMMER AND FULL STACK WEB DEVELOPER

I was in charge of develop and give maintenance to the different web sites that the enterprise manages using HTML, CSS, JavaScript, PHP and Materialize.  
I managed the databases with MySQL and phpMyAdmin.  
I coded new functions for the TBR's Software called PACT. I improved its styles, structure, performance and I fixed bugs.  
Some of the new functions that I programmed were forms, interactive graphics and CRUD systems. The logic of this software was worked with PHP using the MVC architecture, JavaScript JQuery, SCSS and HTML, also I managed the data with phpMyAdmin.
